# Safety Data Sheet

<b>Appropriate Engineering Controls</b>	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.
<b>Individual Protective Measures</b>	
Eye / Face Protection	If contact is likely, safety glasses with side shields are recommended.
Hand Protection	Wear appropriate chemical resistant gloves.
Skin Protection	Use of an impervious apron is recommended. Wear appropriate thermal protective clothing, when necessary.
Respiratory Protection	In case of insufficient ventilation, wear suitable respiratory equipment.
Hygiene measures	Observe any medical surveillance requirements. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
